In this workshop you will learn what you need to clearly understand and distinguish the mental and emotional states and archetypes that are the very base of Dr. Bach's Flower Method.

Using the tools and understandings that you receive during this workshop you will be able to clearly see what your clients needs are, enabling you to treat them to a very high standard of Bach Flower Therapy. This workshop is the result of more than 20 years of Bach Flower clinical experience from both Jose Figueroa client practice and his teachers. The course includes a special section for animals and children treatment. You will receive a manual and supporting diploma by Natural Therapy Solutions. The workshop will be held in English by Jose Figueroa.

**The students will learn the original way of distinguishing between the archetypes that lie behind mental and emotional issues, making obsolete the use of aids such as pendulums, kinesiology etc. This allows the therapist to go much deeper into the understanding of the therapeutic needs of the client.**

As a Bach Flower specialist, **José Figueroa García**, is a firm supporter of the integration of natural therapies into the medical world.
